● Available for Freelance Projects

CAREER OBJECTIVE

A highly motivated and results-driven Full Stack Software Developer with 3+ years of hands-on experience building scalable, high-performance web applications. Proficient in modern frontend frameworks including Angular, React and Next.js, with deep expertise in JavaScript and TypeScript, and growing experience with React Native for cross-platform Android/iOS apps. Strong backend development skills using C#, ASP.NET Core and Node.js, complemented by solid experience with PostgreSQL, SQL Server and MongoDB. Adept at designing and implementing secure RESTful APIs, authentication and role-based access control (RBAC) systems, and containerized deployments using Docker. Proven ability to collaborate in Agile environments, deliver clean, maintainable code, and drive solutions from concept to production — including independent freelance work end to end.

EXPERIENCE

Inventia Technology Consultant (P) Ltd.

Software Developer — Full Stack

Deployed via Cyber Matrix Solutions (P) Ltd.

Jan 2024 — Present · Noida, Uttar Pradesh

- Identity & Access Management (IAM):** Worked as a full-stack developer on a comprehensive IAM system, developing user management, role-based access control and authentication services. Designed dynamic, scalable interfaces using Angular and Redux, and developed secure APIs using ASP.NET. Contributed to backend logic for user authentication and session management.
- Head End System (HES):** Contributed to a high-performance, scalable meter data management platform for smart meters, using Angular for the frontend and C# with ASP.NET for backend services. Worked on automating connectivity management and control functionality for power, gas and water utilities.
- WFM (Workforce Management App):** Building a React Native mobile workforce management app — currently in active development.

Cyber Matrix Solutions (P) Ltd.

Software Developer

Jan 2023 — Dec 2023 · Noida, Uttar Pradesh

- Claim to Excel:** Built a responsive frontend for an automated invoice-processing system, optimizing the experience for vendors like OLA, Uber, Swiggy and Zomato.
- LeadShyne:** Implemented lead and account management features in Next.js, integrating user role permissions and enhancing performance through frontend-backend integration.
- BAXY — Mobility:** Developed modules for user permission management and real-time vehicle tracking in a distributor management system using Angular and TypeScript.
- Legal Contract Management System (LCMS):** Created a secure, scalable contract management platform with e-signature capabilities, automating contract review workflows in Angular.
- Ticket Management System (ITSM):** Built a user-friendly ticket management system with approval workflows, optimizing IT service delivery and task tracking.

EDUCATION

Dr. APJ Abdul Kalam Technical University

Bachelor of Technology — Computer Science Engineering · 2018 – 2022 · CGPA: 7.1/10

Lucknow, Uttar Pradesh

Central Board of Secondary Education

Senior Secondary — 2018 | Higher Secondary — 2016

Dadri, Uttar Pradesh

SKILLS

Programming Languages: HTML, CSS, JavaScript, TypeScript, C#

Frontend Frameworks: Angular, React, Next.js

Mobile: React Native (Android & iOS)

Styling: Bootstrap, SCSS, Tailwind CSS

Backend: Node.js, C#, .NET, ASP.NET Core, RESTful API design, Authentication & RBAC

DevOps & Cloud: Docker, Kubernetes, Apache Kafka, Git/SVN, basic Jenkins (CI/CD)

Databases: PostgreSQL, SQL Server, MySQL, MongoDB — query optimization & data modeling

Testing & Tools: Jest, Chrome DevTools, Postman, VS Code, Git/SVN, Eclipse, NetBeans

Interpersonal: Problem solving, analytical/critical thinking, team collaboration (Agile)

PROJECTS

Identity & Access Management (IAM)

Angular, Redux, C#, ASP.NET, SCSS

FULL STACK DEVELOPER

Ensures the right people and roles in an organization can access exactly the tools they need — user management, RBAC and secure authentication.

Head End System (HES)

Angular, Redux, C#, ASP.NET, SCSS

FULL STACK DEVELOPER

Acquires meter data from smart meters, manages connectivity and automates control without manual intervention for power, gas and water utilities.

Claim to Excel

Next.js, Redux, SCSS

FRONTEND DEVELOPER

Automated process where delivery/mobility vendors upload claim PDFs, convert them into spreadsheets and merge multiple documents into one.

LeadShyne

Next.js, Redux, SCSS, MUI

FRONTEND DEVELOPER

Leads, accounts, opportunities, expense and leave management, quotations, and role/user permission management.

BAXY — Mobility <i>Angular, TypeScript, SCSS</i> Distributor management system — user permissions, vehicle service records, sales management, claim requests and fleet tracking.	FRONTEND DEVELOPER
Legal Contract Management System (LCMS) <i>Angular, TypeScript, SCSS, Bootstrap</i> Centralized contract repository with standardized drafting, automated review/approval workflows and legally binding e-signature execution.	FRONTEND DEVELOPER
Ticket Management System (ITSM) <i>Angular, TypeScript, SCSS, Bootstrap</i> Approval, rejection and pending-approval ticket states with end-to-end tracking for IT service delivery.	FRONTEND DEVELOPER
RKGC Group — Corporate Website <i>React, Vite, Redux Toolkit, Tailwind CSS, Framer Motion, Supabase</i> Live marketing site for a multi-vertical construction & infrastructure group, with an admin panel for leads and job applications. rkcggroup.com	FREELANCE · FULL STACK
RKGC Group — Mobile App <i>React Native</i> Mobile companion app for RKGC Group — same core experience as the website. Currently in active development, not yet published.	FREELANCE · IN DEVELOPMENT
WFM — Workforce Management App <i>React Native</i> Mobile workforce management app, built at Inventia Technology Consultant. Currently in active development, not yet released.	IN DEVELOPMENT
Hillberg — Shopify Storefront <i>Shopify, Liquid, CSS, JavaScript</i> Shopify theme customization and storefront setup for an apparel & home-lifestyle catalog. hillberg.in	FREELANCE · THEME SETUP

LANGUAGES & HOBBIES

English & Hindi · Cricket and listening to music
